EDUCATION

- Mapúa Malayan Colleges Laguna
Bachelor of Science in Information Technology
Expected Graduation: October, 2026

TECHNICAL SKILLS

Programming Languages

- Python
- C++
- C#
- Dart
- HTML
- JavaScript
- CSS

Backend Development

- Rest API Integration
- CRUD Operations
- JSON Handling
- Client-Server Communication
- Authentication & Encryption

Database Management

- MySQL
- Oracle SQL
- Table Relationships & Normalization
- Foreign Keys & Constraints
- Triggers
- Stored Procedures

PROFILE

A highly motivated 4th-year BS in Information Technology student at Mapúa Malayan Colleges Laguna, specializing in Cybersecurity. I am seeking an On-the-Job Training (OJT) position to apply my expertise in Database Management and secure information environments. Proficient in designing relational databases and cloud-hosted backend integration via Supabase, I am committed to ensuring data integrity and optimizing structures within a professional data team.

PERSONAL PROJECTS

Dans Cafe Online Platform

- Contributed to the development of a full-featured e-commerce platform tailored for local cafe operations.
- Implemented a dynamic menu management system that supports real-time updates for food and beverage offerings.
- Integrated a streamlined ordering system to bridge the gap between customer selection and kitchen preparation efficiency.

SCAMP Management Application

- Collaboratively developed a business management system to centralize coffee shop operations, including inventory and sales tracking.
- Engineered the user interface for both administrators and customers, enabling management of 45+ menu items and a loyalty rewards system.
- Optimized cross-team communication between cashiers and management through streamlined order coordination and promo management modules.

Financial Prototype System

- Architected a secure transaction processing prototype featuring automated ledger updates in a team-based development environment.
- Designed and implemented relational database schemas to enforce strict data integrity and consistency for all financial records.
- Developed robust backend logic to manage complex financial calculations and ensure high-security data transmission.

Cryptographic Encryption Suite

- Developed a security-focused application that implements classic encryption algorithms such as Caesar and Kama Sutra ciphers.
- Applied advanced logic for data encryption and decryption through sophisticated string manipulation techniques.
- Created an interactive educational tool to visualize the impact of cryptographic methods on information protection.

CERTIFICATES AND ACHIEVEMENTS

- **Professional Proficiency:** TOEIC Proficiency – Score: 805/990 (2025)
- **IT & Networking:** Cisco Certified Ethical Hacker, CCNA, and Introduction to Cybersecurity (2025).
- **Data & AI (Coursera):** IBM SQL for Data Science, IBM Data Analytics, and Google Data Foundations (2025–2026).
- **Cloud & Infrastructure (Coursera):** Pearson Virtualization for Everyone and Packt Hybrid Infrastructure Management (2025–2026).
- **Seminars & Workshops:** JPCS Mapúa MCL Kali Linux Workshop and AI Summit (2024–2026); Technopreneurship Journey by Prosperna Philippines (2024).
- **Academic Honors:** Dean's Lister (A.Y. 2022–2023 & 2024–2025).
